

Running the app locally

Frontend (only):

1. Clone the repo
 - a. In your terminal :
 - i. git clone <https://github.com/pixelbub/sd-project.git>
 - ii. cd sd-project
 - iii. python -m http.server 8000
 - b. In your browser go to : <http://localhost:8000/>
this allows you to test the frontend locally

Frontend plus backend (full stack):

2. Clone frontend using the instructions above
3. Clone backend :
 - a. In your terminal :
 - i. Git clone <https://github.com/TinoGozho/backend.git>
 - ii. cd backend
 - iii. npm init -y
 - iv. node index.js
 - v. if you don't have cors installed use : npm install cors
4. change the frontend urls in the js files from <https://backend-k52m.onrender.com/> to <http://localhost:3000/>
